ACADEMIC STAFF

CORPORATE STRATEGY
The corporate strategy of the Thuto Bophelo Nursing Academy embodies our vision, mission, strategic intent and strategic focus areas. We base our overall strategic direction around these four (4) pivotal factors.

VISION
To become a benchmark for the provisioning of private nursing Education and training and be the preferred provider of private nursing education and training in the country

MISSION
We aim to provide the highest standard of nursing education, which incorporates and addresses the dynamic needs of the entire healthcare sphere (public and private sectors)

STRATEGIC INTENT
To maintain viability and sustainability in the private educational and training market

STRATEGIC FOCUS AREAS
Our strategic focus areas incorporate:
- Empowering the previously disadvantaged communities in South Africa with knowledge and skills
- Growing our business and exploring networking partnerships
- Continuously exploring and utilising marketing opportunities
- Promoting an environment of employees that foster teamwork, personal and professional growth, as well as respect for the individual within a community context; and
Continuously striving to enhance satisfaction of shareholders as members of the community, in rendering healthcare services of the highest qualities.

**STRATEGIC OBJECTIVES**

Our strategic objectives centre on the following principals:
- Providing quality, accessible, flexible learning programs based on adult education principles
- Making re-admission to the educational mainstream possible and doing so, promote lifelong learning
- Providing outreach programs to disadvantaged communities
- Establishing and maintaining partnerships with shareholders in the healthcare market

**SUSTAINABILITY REPORTING FRAMEWORK**

The directors (shareholders) of the Thuto Bophelo Nursing Academy (Pty) Ltd. are responsible for the maintenance of adequate accounting records, and the preparation and integrity of the financial statements and related information. The auditors are responsible to report on the fair presentation of the financial statements.

The directors (shareholders) are also responsible for the company’s system of internal financial control. These are designed to provide reasonable but not absolute, assurance as to the reliability of the financial statements, and to adequately safeguard, verify and maintain accountability of assets, and to prevent and detect misstatement and loss. Nothing has come to the attention of the directors to indicate that any material breakdown in the functioning of these control procedures and systems has occurred during the year under review.

The financial statements have been prepared on the going concern basis, since the directors have every reason to believe that the company has adequate resources in place to continue in operation for the foreseeable future.

The auditors’ and directors’ reports are compiled on an annual basis, in accordance with the company’s financial year end, i.e. 28 February of every year. This annual auditing process also incorporates the academy’s annual budget reviews, which, amongst others, address personnel and personnel development and the purchasing of supplies for the simulation laboratory.

**HISTORY : THUTO BOPHELO**

Since 2000 the Academy has taken over the teaching and training responsibilities of the Mothwa Haven Training School (who has, since 2000 it’s registration, successfully trained and enrolled 2500 nursing Auxiliaries since 1982.)

The classes were conducted in the above wooden cabin at Mothwa Haven. During the course of 1999 the Thuto Bophelo Nursing Academy was founded by an agreement of transfer from Mothwa Haven Training School.

The learning process was upgraded from a normal standard to a broader and more appropriate clinical facility concerning the learning environment by incorporating the private and public sector in the Nursing Education Institution.

We improved the teaching and accompaniment structure of the students by expanding our staff to additional tutors and a student counsellor.

The Academy was moved to a venue more suitable for an educational environment with ideal infrastructural facilities and accessibility of reaching the Academy. (from taxi ranks and railway station.)
**LEGAL STRUCTURE**

Company Registration number (Pty) Ltd 2001/025807/07.

South African Nursing Council: Registration number S1074.

Further Education and Training registration number (with Dept Of Education): 2010/FE07/104 (until 31/12/2016)

**TEACHING AIDS**

- demonstration aids for various purposes.
- Computers and projectors for power point presentation-fixed in all 14 classrooms
- Library: well equipped with up to date books and magazines

**IT SUPPORT AND TEACHING AIDS**

- Information technology centre (outsourced) with 90 computers for utilization by students.

**SCOPE OF PLANNED OPERATIONS**

The learner audiences are nurses and caregivers specifically interested in nursing science.

The learners will possess valuable knowledge and skills, which are recognised and used as the basis to develop greater insight and awareness into the nursing profession, scientific nursing and legal-ethical aspects. Thus it is important to recognise prior learning and to make learning accessible, affordable and equitable.

The learning programmes enhance a culture of learning to enable the learner to embark on life-long learning through adult learning education.

Learners meeting the required outcomes attain the appropriate diploma or certificate thus rewarding learning achievements from the South African Nursing Council.

The short courses as identified by the needs of the community regarding concurrent crisis situations, will assist the members of the community to help themselves and become self sufficient in handling immediate and long-term crises. This will be achieved by obtaining appropriate education as well as knowledge regarding meaningful resources.

Seeing that nursing is an applied human science, the education and training of learners in nursing include a practical learning component, which has to be completed successfully to obtain the relevant qualification. In order to facilitate the clinical learning of our learners, we make use of clinical facilities, which include hospitals, old age homes and community centres.

Our clinical facilities are approved by the South African Nursing Council, which include the agreements entered into with these facilities.

**ASSESSMENT**

Apart from expanding our learning facilities and staying abreast of new developments, we also recognise the importance of forming partnerships with our fellow private nursing education and training institutions. We have identified a gap in the literacy and life skills competencies of our learners. In order to overcome this gap, we have developed and implemented literacy and life skills programmes, which will be accredited with the education SETA and offered at a separate campus site. The critical cross-field outcomes, as stipulated by the South African Qualifications Authority (SAQA), will be used as a guideline in the development of these programmes.

We do not only envisage presenting these programmes at our own sites, but will attempt to form partnerships with other institutions that experience similar problems.
motivating and rewarding our personnel. These types of team competitions also contribute to group cohesion and communication amongst our employees.

Our learners elect a learner representative council (LRC) on an annual basis. We are investigating initiatives to promote the personal and professional growth of our learners and will use the stated body as a “rudder to steer these processes. Incentive schemes, such as bursaries and awards for best achievements, are also awarded to our top learners.

TARGET MARKET

We aim to target school leavers and infuse them with a passion for nursing through marketing programmes and career exhibitions. However, our market includes anybody, irrespective of race, creed or nationality, who wishes to study nursing.

CURRENT AND LONG-TERM DEMAND OF PROGRAMME OFFERINGS

Our present learner numbers reflect a growing demand for the learning programmes that we present. This is evident in light of the fact that we had to purchase satellite campus and employ additional personnel. It is not foreseen that the services we offer will become redundant or obsolete. A stated, nursing care forms a crucial part of the overall healthcare services of a country. In light of the burden that the HIV/AIDS pandemic places on the country’s already stretched healthcare services, Thuto Bophelo Nursing Academy is providing an essential service to enhance the greater South African Community.

SIMILAR PROGRAMS BY OTHER INSTITUTIONS

As known, there are many private institutions that offer similar nursing education and training programmes. The Thuto Bophelo Nursing Academy sets, and will continue to set, it apart from the rest and create a market edge by continually:

- Providing the healthcare sector with a product that is highly in demand, namely quality nurses who provide excellent healthcare and who continually strive to promote personal and professional growth, and
- Identifying learning gaps and implementing strategies to bridge such gaps.

RISK MANAGEMENT

Risk is an integral part of improved performance, growth and sustainable value creation. The Thuto Bophelo Nursing Academy (Pty) Ltd. follows a risk management strategy, which aims to reduce uncertainty and make us more committed in our endeavour to attain the goals embedded in our corporate strategy.

The adoption of an integrated risk management strategy will allow us to ensure that knowledge and experience is shared, while a balance between risk and reward will address fair expectations from shareholders, resource constraints and sustainable development. The framework of our risk management strategy centres on the following aspects:

- The alignment of strategic processes with work processes, which includes our internal and external environments
- The promotion of risk awareness amongst all shareholders and employees in order to promote transparency and efficiency
- The investigation of all options that can be realistically implemented to improve our services, i.e. the delivery of optimal nursing education and training
- The continuous monitoring of changes in our external environment that has an impact on our business
- The implementation of a risk management strategy that includes the monitoring of the total cost risk
- Ensuring that management understands and accepts responsibility for managing any risk that may impact on their key performance areas or the achievements of objectives and that all employees take responsibility for managing the health, safety, environmental and quality risks inherent in their work
- The monitoring, evaluation and implementation of strategies to manage and align relevant issues and changes on a political, economic, social, technological and environmental levels that have an impact on the company
The Thuto Bophelo Nursing Academy (Pty) Ltd maintains accounting and administrative control systems that are designed to provide reasonable assurance that the accounting records accurately reflect that all transactions are executed and recorded in accordance with sound business practices, assets are safeguarded and that protection is provided against serious risk of loss in a cost-effective manner.

ORGANISATIONAL POLICIES

Our policies on staffing, occupational health and safety and HIV/AIDS are contained in a master file and are accessible to personnel. At present the nursing academy is investigating and developing policies to address both learner and personnel wellness.

As ours is a vibrant and ever-growing institution the development of policies and procedures is a continuous task which requires constant revision and development.

LANGUAGE POLICY

The language policy is that all instruction is in English.

EQUITY POLICY

All applicants will be considered, with the understanding that preference will be given to the designated groups in accordance with this locality’s Employment Equity Plan.
